

Lazy Launcher

A minimal Android launcher that asks one tiny thing every time you unlock — and quietly builds the habits you wish you had.

EVENT-DRIVEN · TYPE-FIRST · POINT ECONOMY · AMBIENT CAPTURE

Philosophy

Every other launcher tries to be your home. This one is closer to a doorway you pass through. It asks one thing as you enter. It hands you a receipt when you leave. The rest of the time, it is quiet.

FOUR PRINCIPLES

Event-driven, not browseable.

Most features are never opened from a menu. They appear when their moment is — at the unlock, after a session, when you fail, when the hour turns. The menu exists, but only as a fallback for power users (Search).

Friction as a feature.

A Lobby waits before a distraction. A passphrase guards Settings. Mantra reps gate the morning unlock. The friction is the point — it converts impulse into intent.

Type-first, no icons.

Apps are text. Tasks are text. Reviews are sentences. Icons are decoration that makes scrolling feel cheap. Text makes it feel deliberate.

Points are receipts, not currency.

You see the cost when you create a task and the payout when you complete one. There is no leaderboard race, no streak push notifications. Points record what happened.

WHAT IT IS NOT

- Not a productivity app you open. It opens itself.
- Not a digital-wellness scoreboard. The point of the score is to disappear.
- Not a community feed for likes. The feed exists to make surrender public, not success.
- Not a launcher you can leave. Anti-uninstall (72hr cool-down, future-self video) is core, not a setting.

The Unlock Interview

The universal entry point. Every phone unlock plays exactly one beat. Over a week the user has ambiently logged mood × 14, water × 20, ideas × 8, meals × 21, intent × 7. Nobody browsed a menu. Nobody opened "Mood Tracker." The data accumulated through small interruptions the user already paid for.

TWO BEAT TYPES

ASK

- Mood right now? (😞 / 😐 / 😊)
- What did you ship in the last 2h?
- Drank water? Last meal? Pages read?
- One idea worth keeping? Grateful for?
- Spent money on? On what?
- Tomorrow's one thing?

SHOW

- Sad self ("you opened me 14× today")
- A highlight from your past reading
- Future-you video, recorded weeks ago
- Streak status / level progress
- Receipt: time spent today on X

SCHEDULING — WHAT GETS ASKED WHEN

It is not random. The queue is weighted by:

```
priority = base_weight
          × (1 + hours_since_last_capture × decay)
          × time_of_day_match
          × form_modulation
```

FIRST UNLOCK OF DAY	Morning ritual (intention, mantra, sleep log) — expanded beat
AFTER LUNCH (12–2PM)	Meal / mood
AFTER CLOSING IG/TIKTOK	Receipt + "what did you actually want?"
RANDOM MID-DAY	Idea, water, gratitude
EVENING (6–10PM)	Shutdown ritual — what shipped, tomorrow's one thing
LOW FORM (<40%)	Bias toward SHOW beats (sad self, future you, highlight)
HIGH FORM (>80%)	Bias toward ASK beats — you're earning trust, capture more

SKIP BEHAVIOR

Skip is free but tracked. After 3 consecutive skips of a category, Sad Self surfaces: "you haven't checked in on your mood in 4 days." Friction without punishment.

Point Economy

Points are the bookkeeping for behavior. You earn them by producing, you spend them to consume. A balanced day creates 5 todos (−15), completes them (+25), nets +10 — which buys 10 minutes of Twitter back to zero. You can only consume what you produced.

TABLE

ACTION

COST

Commit habit (recurring)

-50

+3 / day

break-even ~17 days

Start project

-30

+50 on ship

+20

Spend on distraction apps

1 pt = 1 min

—

depletes balance

WHY THESE NUMBERS

Each todo's break-even success rate is 60% (3 cost / 5 reward). A user who reliably ships above that bar nets positive — but overcommitting overloads the balance and triggers Sad Self.

Habits at -50 / +3 force a 17-day commitment to break even. This filters out impulsive habit-creation; only users with conviction reach the payout.

Projects at -30 / +50 reward the long arc. You feel the cost weeks before the payout.

FORGIVENESS

Late completion (within 1 hour of deadline) refunds the original 3-pt investment. Loss aversion still applies (no profit), but the user is not punished for being human. Source: optimized-gamification research recommends a small refund window to soften missed deadlines and preserve momentum.

Form — $F \in [0, 1]$

A single number that summarizes the user's recent self-trust. Updates daily. Replaces the older 5-state Behavior Indicator with a mathematically principled value.

FORMULA

```
F = 0.5 · (completed / created) over last 14 days
  + 0.3 · (1 - e(-streak / 7))
  - 0.2 · (1 - e(-misses / 7))
clamp(F, 0, 1)
```

WHAT F SHAPES

$F < 0.40$

Lobby wait 90s. Sad Self surfaces more often.
Breath gate before distractions. Question difficulty drops to simple yes/no.

$0.40 \leq F < 0.60$

Standard Lobby wait. Mixed ASK/SHOW beats.
Receipts always shown after closing distraction apps.

$0.60 \leq F < 0.80$

Eligible for level promotion. Lobby wait ~20s.
Ask-beats outweigh show-beats. Deeper journal prompts.

$F \geq 0.80$

Lobby instant. Sad Self silent. Sophisticated capture beats (voice dumps, dream journal).
Eligibility for graduate-mode preview.

LEADERBOARD MATH

Among friends in a joined group: rank = $F \times$ points. A user with 400 pts and 0.41 form ranks below a user with 244 pts and 0.73 form. Sustained engagement beats one-off hoarding.

Level Ladder

Ten levels of commitment. Promotion requires 14 consecutive days of full completion at the current level. Demotion triggers after 7 consecutive fail-days. Level 10 is graduate mode — the UI nearly disappears, only a quiet daily check-in remains.

LEVEL

COMMITMENT

SHAPE

L1

15m / day

starter · 1 todo

L2

30m / day

2 todos · first habit

L3

1h / day

3 todos · 1 habit

L4

2h / day

5 todos · 2 habits · 1 project

L5

3h / day

7 todos · 3 habits

L6

4h / day

first project deadlines

L7

5h / day

team / group commitments

L8

6h / day

deep work blocks · 2h+

L9

7h / day

near-grind · uncommon

L10

15m / day

graduate · habits internalized · UI fades

WHY THE INVERSION AT L10

Higher levels increase commitment, until L10. By then the habits are internalized; the app only needs to check in. The Graduate Mode (LIFECYCLE-001) makes the launcher near-invisible — stats-only widget, monthly review, optional uninstall enabled.

ELIGIBILITY

Form must be > 0.60 for promotion. A user can be at L4 with poor form and stay there indefinitely without leveling up, even after 14 perfect days. The form gate prevents pure-grind escalation.

1.1

Unlock — Mood

WHAT IT SHOWS

A single question with three emoji choices: low / ok / good. Tap one to save and continue to the home screen. Skipping is free, but tracked.

WHEN IT APPEARS

Played on a phone unlock when no mood ping in the last 8 hours and time-of-day is between 09:00 and 22:00.

FEATURES COVERED

PROD-017 Mood Pings · RESTRICT-015 Reverse Notifications

NOTES

+1 pt for answering. Skip 3 in a row → Sad Self beat surfaces at the next unlock.

1.2

Unlock — Typed Journal

WHAT IT SHOWS

A short typed-answer prompt. The same shape is reused for ideas, meals, intent, gratitude — only the question changes.

WHEN IT APPEARS

Played 2+ hours into a focus block, or on the first unlock after a deep-work session, when the user has not journaled recently.

FEATURES COVERED

PROD-004 Journal · PROD-009 Ideas · INTEG-010 Voice-to-Structured-Data · MIND-004 Subconscious Dump

NOTES

+2 pts past 10 characters. The cursor pulses orange. Submission auto-categorizes via on-device LLM.

1.3

Unlock — Sad Self

WHAT IT SHOWS

A pointed message from "sad you" with a real receipt of today's distraction usage. No input — only tap to continue.

WHEN IT APPEARS

On unlock when daily distraction-app usage exceeds the user's set ceiling OR they have skipped 3 consecutive ask-beats.

FEATURES COVERED

SAD-001 Sad Self Notifications · SAD-002 Voice Style · PSYCH-008 Intervention Screen · PSYCH-011 Phantom Checks

NOTES

Backed off if ignored 5× — surfaces less, but the message gets sharper. Voice style is configurable: gentle / blunt / sarcastic / philosophical.

1.4

Unlock — Highlight

WHAT IT SHOWS

A single highlight from a book the user has read, with source and date. A pure show-beat — no decision required.

WHEN IT APPEARS

On unlock with probability proportional to (days since last show-beat) × time-of-day match. Picks from the user's saved highlights.

FEATURES COVERED

READ-002 Daily Highlight Resurfacing · MIND-007 Reading-as-Thinking · PSYCH-015 Future Self Messenger

NOTES

Drawn from Kindle/Readwise sync. Same shape can resurface a Future-Self letter the user wrote weeks ago.

2.1

Home — Morning

WHAT IT SHOWS

A large clock, the user's mantra (which they must speak/type 3× to fully unlock), an empty One Thing card, and the week-so-far bar chart. Apps are deliberately hidden until the first todo earns them.

WHEN IT APPEARS

Active from first unlock after 5:00 AM until 11:00 AM. After the mantra-gate reps, the home transitions to capture today's one thing.

FEATURES COVERED

CORE-001 Home Screen · MANTRA-001 Mantra Gate · PROD-007 Morning Routine · PROD-013 One Thing · PSYCH-001 Identity Voting · GAMIFY-006 Streaks

NOTES

Mantra reps scale with level. L4+ requires 3; L8+ adds the day's task statement.

2.2

Home — Day

WHAT IT SHOWS

The currently-active task pinned at top with its progress bar and app-unlock badge. The next three tasks in the queue. A list of five essential apps. A four-tab dock (tasks · review · search · feed).

WHEN IT APPEARS

Active 11:00 AM through 18:00. Replaced by Evening mode at the user's configured shutdown hour.

FEATURES COVERED

CORE-002 5-App Dock · PROD-002 Project Tracking · PROD-005 Focus Timer · RESTRICT-010 Context-Aware Locks · PSYCH-004 Builder Mode

NOTES

App icons are absent by design. The five apps are user-selected with a 24-hour cooldown on changes.

2.3

Home — Evening

WHAT IT SHOWS

Today's ledger — wins, losses, net points, form delta. Capture for tomorrow's one thing. A countdown to dream mode and a wind-down 4-7-8 breath button.

WHEN IT APPEARS

Active from the user's shutdown hour (default 18:00) until 22:00. Always plays the shutdown ritual on the first unlock in this window.

FEATURES COVERED

PROD-012 Shutdown Ritual · PROD-004 Journal (auto-summary) · LIFE-003 Sunday Life Review (weekly variant) · RESTRICT-011 Dream Mode

NOTES

Late-tomorrow scheduling can be voice-captured via INTEG-010.

2.4

Home — Night

WHAT IT SHOWS

A dim clock, tomorrow's schedule, the 4-7-8 breath circle exercise, and a quiet line confirming that apps are asleep.

WHEN IT APPEARS

Active from 22:00 until the user's wake alarm. Distraction apps are unreachable; only the alarm and Kindle/audiobook apps respond.

FEATURES COVERED

RESTRICT-011 Dream Mode · SLEEP-003 Sleep Window Guardrails · HARDWARE-002 Breath Gate · MIND-001 Meditation Log

NOTES

Phone sabbath (COUPLES-002) can extend this mode to a full day.

3.1

Tasks — Today

WHAT IT SHOWS

A summary of cost/payout, the week streak, the live task highlighted, and the next-up queue. Three creation actions show their cost explicitly.

WHEN IT APPEARS

Reachable from the Day-mode dock OR the Tasks slash-command in Search. Live task is always pinned at top.

FEATURES COVERED

PROD-001 Todo with App-Unlock · PROD-002 Project Tracking · TRACK-001 Track System · GAMIFY-003 Focus Score Economy

NOTES

Habits cost 50 pts; projects cost 30 pts; todos cost 3 pts. The balance is shown before each creation.

3.2

Tasks — Create

WHAT IT SHOWS

Name, time estimate, app-unlock picker, and a preview block showing the -3 / +5 / refund-on-late terms. The commit button is the only way to spend.

WHEN IT APPEARS

Modal opened from Tasks list or via the create-todo shortcut.

FEATURES COVERED

PROD-001 Todo · PROD-010 Effort Estimation Training · PROD-019 Companion Verification (optional)

NOTES

Estimates feed PROD-010 — actuals are logged and the user's estimation accuracy is tracked over time.

3.3

Tasks — Completion

WHAT IT SHOWS

Payout, balance, streak progress toward next level, form delta, and the unlocked app card if applicable. Two CTAs: open the unlocked app, or pocket the time.

WHEN IT APPEARS

On marking a task done. Auto-confirmed for time-bounded tasks; tap-confirmed otherwise.

FEATURES COVERED

PROD-001 Todo · GAMIFY-001 The Applause · PSYCH-002 Session Receipts · GAMIFY-006 Streak System

NOTES

Pocketing the time is the celebrated choice — the user keeps the points without spending them on distraction.

3.4

Tasks — Surrender

WHAT IT SHOWS

Cost, streak impact, social visibility. Two CTAs: keep going (primary), surrender (danger).

WHEN IT APPEARS

On tapping "give up" on an in-progress task. A two-step confirmation; cannot be skipped.

FEATURES COVERED

PROD-001 Todo · SOCIAL-003 Shame Notification · SOCIAL-005 Disappointment API · RECOVERY-001 After-Fall Ritual

NOTES

Surrender posts to the user's group feed. The After-Fall ritual triggers automatically on the next unlock.

4.1

Level

WHAT IT SHOWS

Current level, days remaining to promotion, fail-days warning, and the full L1–L10 ladder with the user pinned in place.

WHEN IT APPEARS

Reached via the L4·73%·244 badge on the home screen, OR by typing "level" in Search.

FEATURES COVERED

TRACK-001 Track System · TRACK-002 Level-Up Mechanics · TRACK-003 Multiple Independent Tracks · LIFECYCLE-001 Graduate Mode

NOTES

Tracks can be set per-domain (Focus, Sleep, Fitness, Learning) and level independently.

4.2

Form

WHAT IT SHOWS

Current F value, the formula, a 14-day dot history, and a card showing how the current value modulates the rest of the app.

WHEN IT APPEARS

Reached via the 73% segment of the home badge.

FEATURES COVERED

PROD-003 Behavior Indicator (modernized) · SAD-005 Adaptive Frequency · RESTRICT-001 Lobby Wait modulation

NOTES

The formula is intentionally visible — the user understands how the metric works, which is a transparency requirement (ETHICS-001).

4.3

Review

WHAT IT SHOWS

A scrollable sentence ledger across every tracked domain (focus, sleep, money, fitness, mood, reading, people, patterns).

WHEN IT APPEARS

Reachable via the dock's review tab. Sentence-only — no charts unless tapped.

FEATURES COVERED

LIFE-001 Personal Bloomberg · LIFE-002 Auto-Insight Engine · LIFE-003 Sunday Life Review · SOCIAL-010 Built Wrapped · PSYCH-012 Pattern Detection

NOTES

Each sentence is tappable; the detail view (4.4) shows the underlying data.

4.4

Review — Detail

WHAT IT SHOWS

The same one-sentence shape expanded into a quantitative breakdown — categories, comparison vs prior period, and pending review items (e.g. Regret Receipts).

WHEN IT APPEARS

From a tapped sentence on the Review screen — example shown is the spending sentence.

FEATURES COVERED

FIN-001 Auto-Categorized Spend · FIN-004 Savings Rate · FIN-006 Time-Money · FIN-008 Regret Receipts

NOTES

Pattern is reused for every other domain — fitness detail, mood detail, etc. use the same shape.

5.1

Feed

WHAT IT SHOWS

Reverse-chronological group events: completions, surrenders, milestones, level changes, skipped-unlock warnings. Initials, not avatars. Three tabs: feed / leaderboard / profile.

WHEN IT APPEARS

Only visible if the user has joined at least one group. Otherwise the dock tab is replaced by a join CTA.

FEATURES COVERED

SOCIAL-001 Groups · SOCIAL-003 Shame Notification · SOCIAL-016 Chronological Feed · SOCIAL-021 Focus Stories · SOCIAL-025 Dual Streaks · SOCIAL-029 Push Reactions

NOTES

No algorithm. No like counts. Surrender events are intentionally as prominent as completions.

5.2

Search · Menu

WHAT IT SHOWS

Recent items, time-of-day suggestions, and a category index. Type to filter anything — features, friends, apps, journal entries.

WHEN IT APPEARS

Long-press home OR swipe up from any screen. Replaces the traditional app drawer and the legacy 80-row menu.

FEATURES COVERED

CORE-003 Hidden App Search · all 250 features (via the index)

NOTES

The category index makes features discoverable without being browseable. Power users find anything in two keystrokes.

5.3

Lobby — Intercept

WHAT IT SHOWS

App being opened, large countdown timer, the form-modulated wait length, and an intent declaration prompt. A back button is offered, never a skip.

WHEN IT APPEARS

Played when a distraction app is launched. The user must wait, then declare their intent. Cannot be skipped.

FEATURES COVERED

RESTRICT-001 The Lobby · RESTRICT-006 Intent Declaration · RESTRICT-002 Cognitive Tax · PSYCH-010 Last Day Test · RESTRICT-007 Escalating Lockout

NOTES

Wait length: 15s for productive apps, up to 90s for distractions. Form > 0.80 cuts the wait to instant.

5.4

Receipt — After Close

WHAT IT SHOWS

Time spent, cost in points, equivalents (books, calls, exercise, money), and the count of todos shipped during the session.

WHEN IT APPEARS

Played the moment the user closes a distraction app (whether by timeout or manual exit).

FEATURES COVERED

PSYCH-002 Session Receipts · PSYCH-007 Opportunity Cost · PSYCH-003 Legacy Counter · FIN-006 Time-Money Conversion

NOTES

A primary CTA invites the user to start a small todo to earn the time back — converting regret into a next action.

Feature Index

Mapping the master spec to surfaces. Each feature lives on a screen (1.1–5.4) or as an intercept (no surface — only triggered). Full 250-feature list is the upstream JSON.

INTERCEPTS — NEVER BROWSED, ALWAYS TRIGGERED

RESTRICT-001	The Lobby — wait timer before distraction
RESTRICT-002	Cognitive Tax — puzzle gate
RESTRICT-003	Progressive Dimming Overlay
RESTRICT-006	Intent Declaration
RESTRICT-007	Escalating Lockout
PSYCH-002	Session Receipts
PSYCH-008	Intervention Screen (14 unlocks)

ANTI-UNINSTALL — THE MOAT

UNINSTALL-001	Device Admin Registration
UNINSTALL-002	72-hour Cooldown Deactivation
UNINSTALL-003	Nuclear Passphrase (20+ char paper key)
UNINSTALL-004	Future Self Video on Attempt
UNINSTALL-005	Public Shame Post on Uninstall
UNINSTALL-006	Relapse Prediction on Uninstall Screen
UNINSTALL-007	Graduated Freedom
SAFETY-001	Crisis Detection & Soften Mode

Roadmap — Four Stages

Stage 1 must work on the author's phone before Stage 2 begins. Each subsequent stage assumes the prior one's primitives are in production. The 18 "technically impossible" features from the master spec are explicitly excluded.

STAGE 1 · 4-6 WEEKS

5 key feature groups

MVP — A launcher that hurts to leave

Bare minimum to dogfood. Launcher + restriction primitives + anti-uninstall + onboarding. Author must dogfood without bypass before exit.

- CORE-001..005 home, dock, search, usage, widgets
- UNINSTALL-001/002 device admin + 72h cooldown
- ETHICS-001 transparency · A11Y-001 accessibility
- RESTRICT-001/002/003 lobby, cognitive tax, dimming
- ONBOARD-001/002 first-run + Why Are You Here

STAGE 2 · 3-4 MONTHS

8 key feature groups

V1 — Track engine + full psychology + integrations

Track engine, full Sad Self, Mantra Gate, productivity loop, basic integrations, encrypted backup. Beta with 100 testers.

- TRACK-001..004 levels + baseline detection
- MANTRA-001/002/003 mantra gate
- BACKUP-001/002 encrypted backup + export
- PAY-001..003 Play Billing + web Stripe + router
- SAD-001..005 Sad/Proud Self + adaptive frequency
- PSYCH-001..015 identity voting, receipts, future self
- INTEG-001 HealthConnect · SLEEP-001 sleep · FIT-001 activity
- PLATFORM-002 Chrome-homepage web app

STAGE 3 · 6+ MONTHS

9 key feature groups

V2 — Social tier, financial stakes, hardware, life integrations

The moat. Social accountability, escrow stakes, NFC/breath/posture, couples/family, Plaid + life integrations, Built Wrapped MVP, AI insight engine.

- SOCIAL-001..036 groups, feed, streaks, sponsor
- HARDWARE-001/002/004 NFC, breath, posture
- INTEG-002 Plaid · INTEG-006 Photos · INTEG-007 Calendar
- LOC-001..006 location heatmap, third places, travel
- ABSURD-001..004 kazoo, narrator, time dilation
- FINANCE-001/002 escrow + streak insurance
- COUPLES-001/002 + FAMILY-001 pairing
- FIN-001..006 spending + net worth + subscriptions
- LIFE-001..010 Bloomberg, auto-insights, Wrapped

V3 — OS for life

Marketplace, B2B dashboards, web/desktop companion, WearOS, AI Life Coach, multi-domain Wrapped, full social experimentation surfaces.

- CREATOR-001/002 track marketplace + mentor subs
- PLATFORM-001 full read+write web companion
- LIFECYCLE-001 Graduate Mode
- NUT-001..004 plate-photo, fasting, trigger-foods
- LIFE-005..011 annual report, counterfactual twin, AI life coach
- B2B-001/002 therapist + team dashboards
- HARDWARE-003 WearOS
- MIND-003..007 voice EQ, dump, vitals, dream, reading
- FIN-007..012 future budget, regret, joint mode, Wrapped Money
- IDENT-001..005 selfie timelapse, promise ratio, courage logs
